

Student Research Grant

The Applied Photonic Group, at CEMDATIC in ETSI Telecomunicación of Universidad Politécnica de Madrid, offers a grant for collaboration in research activities and development of Master Thesis in the Master in Photonics Engineering.

Research subject: Design and development of doppler lidar for wind measurements

Conditions:

- 20 hours per week, 500 €/month, 10 months.
- Starting date: 18.09.2017.

Requirements

- Students already admitted into the Master in Photonics Engineering (www.uc3m.es/miphot)
- High academic marks
- Interest on research in Photonic Systems

Contact:

- Send CV, motivation letter and references to Ignacio Esquivias (ignacio.esquivias@upm.es) before July 23th, 2017.

Madrid, July 23th, 2017
