1. Description

1.1. Subject details

Name of the subject	93000812 - Fiber optics communications
No of credits	6 ECTS
Type	Optional
Academic year of the programme	Second year
Semester of tuition	Semester 4
Tuition period	February-June
Tuition languages	English
Degree programme	09AQ - Master Universitario en Ingenieria de Telecomunicacion
Centre	Escuela Tecnica Superior de Ingenieros de Telecomunicacion
Academic year	2017-18

2. Faculty

2.1. Faculty members with subject teaching role

Name and surname	Office/Room	Email	Tutoring hours *
Ignacio Esquivias Moscardo (Subject coordinator)	B-115	ignacio.esquivias@upm.es	Sin horario. Concertar hora previa
Miguel Angel Muriel Fernandez	B-118	m.muriel@upm.es	Sin horario. Concertar hora previa

Morten Andreas Geday	B-321	morten.geday@upm.es	Sin horario. Concertar hora previa
Patxi Xabier Quintana Arregui	B-321	x.quintana@upm.es	Sin horario. Concertar hora previa
Ana Pilar Gonzalez Marcos	B-116	anapilar.gonzalez@upm.es	Sin horario. Concertar hora previa
Francisco Jose Lopez Hernandez	B-120	francisco.lopez.hernandez@ upm.es	Sin horario. Concertar hora previa
Santiago Aguilera Navarro	B-101	santiago.aguilera@upm.es	Sin horario. Concertar hora previa
Antonio Perez Serrano	B-101	antonio.perez.serrano@upm. es	Sin horario. Concertar hora previa

* The tutoring schedule is indicative and subject to possible changes. Please check tutoring times with the faculty member in charge.

3. Prior knowledge recommended to take the subject

3.1. Recommended (passed) subjects

- Sistemas de comunicaciones
- Redes de comunicaciones

3.2. Other recommended learning outcomes

- Fundamentals of optical communication systems

4. Skills and learning outcomes *

4.1. Skills to be learned

CE13 - Capacidad para aplicar conocimientos avanzados de fotónica y optoelectrónica, así como electrónica de alta frecuencia.

CE3 - Capacidad para implementar sistemas por cable, línea, satélite en entornos de comunicaciones fijas y móviles.

4.2. Learning outcomes

RA67 - Capacidad de utilizar dispositivos e instrumentos relacionados con comunicaciones ópticas avanzadas

RA66 - Capacidad de analizar, diseñar, implementar y caracterizar sistemas avanzados de comunicaciones ópticas

RA68 - Compresión de los procesos físicos que afectan las prestaciones de los sistemas avanzados de comunicaciones ópticas

* The Learning Guides should reflect the Skills and Learning Outcomes in the same way as indicated in the Degree Verification Memory. For this reason, they have not been translated into English and appear in Spanish.

5. Brief description of the subject and syllabus

5.1. Brief description of the subject

The general objective of the subject is to provide students with the ability to understand, analyze, and design, as well as the associated knowledge, in present fiber optic communications systems and in recent technological advances defining the future evolution.

To achieve this general objective, the different types of components and current systems will be studied (new modulation formats, coherent communications, high spectral efficiency, etc.) with emphasis on their behavior from the point of view of optical signal and their performance in link length and binary rate.

1. THEORETICAL LECTURES: These lectures will be used for the presentation of the contents, based on the

resources provided to the students through the Moodle platform .

2. **PROBLEM SESSIONS:** During the sessions the lecturer will propose problems that the student should solve as a personal work. Later, some of the proposed problems will be solved in the classroom, with the active participation of the students, clarifying the doubts.

3. **LABORATORY SESSIONS:** In the laboratory the concepts of optical communications seen in the face-to-face lectures are developed in a practical way.

5.2. Syllabus

1. Introduction to present Optical Communication Systems
 - 1.1. Historical perspective
 - 1.2. Ethernet and Optical Transport Networks (OTN)
 - 1.3. Basic concepts in photonics systems and networks
2. Optical Signal Generation
 - 2.1. Single-frequency Lasers
 - 2.2. Tunable lasers
 - 2.3. Optical Modulators
 - 2.4. Modulation Formats
 - 2.5. Multicarrier signal generation
3. Signal propagation in optical fibers
 - 3.1. Propagation in singlemode fibers
 - 3.2. Propagation in multimode fibers
 - 3.3. Non-linear Effects
 - 3.4. Multi-core and few-mode Fibers
4. Optical Amplification
 - 4.1. Semiconductor Optical Amplifiers
 - 4.2. Doped Fiber Optical Amplifiers
 - 4.3. Raman and Brillouin Optical Amplifiers

5. Signal recovery and noise

5.1. Noise types

5.2. Receiver parameters

5.3. Signal impairments

5.4. Coherent digital receivers

6. Advanced Systems

6.1. O-OFDM (Optical-Orthogonal Frequency Division Multiplexion) Systems

6.2. MIMO (Multiple Input Multiple Output) optical communications

7. Channel Capacity and Energy Efficiency

7.1. Limits of Channel Capacity

7.2. Energy-efficient Optical Transmission

8. Laboratory Sessions

8.1. Session 1: Spectral Characterization of optical emitters

8.2. Session 2: Characterization of an EDFA

8.3. Session 3: Mode Propagation in fiber

8.4. Session 4: Link characterization with OTDR

8.5. Session 5: Optical link design and simulation

6. Schedule

6.1. Subject schedule*

Week	Face-to-face classroom activities	Face-to-face laboratory activities	Other face-to-face activities	Assessment activities
1	<p>Chapter 1: Introduction to Optical Communications Duration: 02:00 Lecture</p> <p>Chapter 2: Optical Signal Generation Duration: 02:00 Lecture</p>			
2	<p>Chapter 2: Optical Signal Generation Duration: 02:00 Lecture</p> <p>Chapter 2: Optical Signal Generation Duration: 02:00 Problem-solving class</p>			
3	<p>Chapter 2: Optical Signal Generation Duration: 02:00 Problem-solving class</p> <p>Chapter 3: Signal propagation in optical fibers Duration: 02:00 Lecture</p>			
4	<p>Chapter 3: Signal propagation in optical fibers Duration: 02:00 Lecture</p> <p>Chapter 3: Signal propagation in optical fibers Duration: 02:00 Problem-solving class</p>			
5	<p>Chapter 3: Signal propagation in optical fibers Duration: 02:00 Problem-solving class</p>			<p>First partial exam Written test Continuous assessment Duration: 02:00</p>
6	<p>Chapter 4: Optical Amplification Duration: 02:00 Lecture</p> <p>Chapter 4: Optical Amplification Duration: 02:00 Problem-solving class</p>			

7	<p>Chapter 4: Optical Amplification Duration: 01:00 Lecture</p> <p>Chapter 4: Optical Amplification Duration: 01:00 Problem-solving class</p> <p>Chapter 5: Signal Recovery and Noise Sources Duration: 02:00 Lecture</p>			
8	<p>Chapter 5: Signal Recovery and Noise Sources Duration: 02:00 Lecture</p> <p>Chapter 5: Signal Recovery and Noise Sources Duration: 02:00 Problem-solving class</p>			
9	<p>Chapter 5: Signal Recovery and Noise Sources Duration: 02:00 Problem-solving class</p>	<p>Lab Session 1 Duration: 03:00 Laboratory assignments</p>		
10	<p>Chapter 6: Advanced Systems Duration: 02:00 Lecture</p>	<p>Lab Session 2 Duration: 03:00 Laboratory assignments</p>		
11	<p>Chapter 6: Advanced Systems Duration: 02:00 Problem-solving class</p>	<p>Lab Session 3 Duration: 03:00 Laboratory assignments</p>		
12	<p>Chapter 7: Channel Capacity and Energy Efficiency Duration: 02:00 Lecture</p>	<p>Lab Session 4 Duration: 03:00 Laboratory assignments</p>		
13	<p>Chapter 7: Channel Capacity and Energy Efficiency Duration: 02:00 Problem-solving class</p>	<p>Lab Session 5 Duration: 03:00 Laboratory assignments</p>		
14				<p>Second partial exam Written test Continuous assessment Duration: 02:00</p> <p>Lab Exam Problem-solving test Continuous assessment Duration: 01:00</p>
15				
16				
17				<p>Final Exam Written test Final examination Duration: 03:00</p> <p>Final Lab Exam Problem-solving test Final examination Duration: 01:00</p>

The independent study hours are training activities during which students should spend time on individual study or individual assignments.

Depending on the programme study plan, total values will be calculated according to the ECTS credit unit as 26/27 hours of student face-to-face contact and independent study time.

* The subject schedule is based on a previous theoretical planning of the subject plan and might go through experience some unexpected changes along throughout the academic year.

7. Activities and assessment criteria

7.1. Assessment activities

7.1.1. Continuous assessment

Week	Description	Modality	Type	Duration	Weight	Minimum grade	Evaluated skills
5	First partial exam	Written test	Face-to-face	02:00	40%	4 / 10	CE3 CE13
14	Second partial exam	Written test	Face-to-face	02:00	40%	4 / 10	CE3 CE13
14	Lab Exam	Problem-solving test	Face-to-face	01:00	20%	4 / 10	CE3 CE13

7.1.2. Final examination

Week	Description	Modality	Type	Duration	Weight	Minimum grade	Evaluated skills
17	Final Exam	Written test	Face-to-face	03:00	80%	4 / 10	CE3 CE13
17	Final Lab Exam	Problem-solving test	Face-to-face	01:00	20%	4 / 10	CE3 CE13

7.1.3. Referred (re-sit) examination

No se ha definido la evaluación extraordinaria.

7.2. Assessment criteria

The final grade in the **continuous evaluation** consists of the marks obtained in the two Partial Exams and in the Lab. Exam, weighted as follows:

Final grade = 40% First Partial Exam + 40% Second Partial Exam + 20% Lab Exam

The minimum qualification in each exam to be able to pass is 4 points out of 10.

For those students wishing to be evaluated by means of a **final exam**, it will have theoretical and lab parts, weighted in the following way

Final grade = 80% Theoretical Final Exam + 20% Laboratory Exam

Extraordinary call

The extraordinary call will consist of a theoretical examination, and a practical evaluation, weighted in the following way:

Final grade = 80% Theoretical Final Exam + 20% Laboratory Exam

"The evaluation by means of final test will use the same types of evaluative techniques that are used in the continuous evaluation (EX, ET, TG, etc.), and it will be done in the dates and hours of final evaluation approved by the School Board for the present course and semester, except those activities of evaluation of learning results of difficult qualification in a final exam, in which case, such evaluation activities may be carried out throughout the course "

8. Teaching resources

8.1. Teaching resources for the subject
