The independent study hours are training activities during which students should spend time on individual study or individual assignments.

Depending on the programme study plan, total values will be calculated according to the ECTS credit unit as 26/27 hours of student face-to-face contact and independent study time.

\* The subject schedule is based on a previous theoretical planning of the subject plan and might go through experience some unexpected changes along throughout the academic year.

## 6.2. Assessment criteria

Students will be qualified through continuous evaluation by default. According to the "Normativa de Evaluación del Aprendizaje de la Universidad Politécnica de Madrid", students willing to renounce to continuous evaluation must present a written application in the School's Secretary before the end of the 3rd week of the semester.

Evaluation will assess if students have acquired all the competences of the subject. Thus, evaluation through final assessment will be carried out considering all the evaluation techniques used in continuous evaluation (EX, ET, TG, etc.), and will be celebrated in the exam period approved by Junta de Escuela for the current academic semester and year. Evaluation activities that assess learning outcomes that cannot be evaluated through a single exam can be carried out along the semester.

Extraordinary examination will be carried out exclusively by the final examination method.

Continuous evaluation:

This is the default and the recommended method. It comprises:

- Participation and exercises during the classes (10%)
- 1st partial exam (35%)
- 2nd partial exam (35%)
- Teamwork: written and oral presentation of a case study (20%)

Final assessment:

The students that renounce to continuous evaluation (by presenting the written application on time) will be

evaluated with a final exam plus the written and oral presentation of the teamwork (in the same conditions and dates that the other students)
