

PROJECT MANAGEMENT (5 ECTS, Semester 1, 93001392):

Concepts and tools for drawing up a project proposal; requirements analysis and definition of scope, scheduling and necessary resources, associated budget and risk identification.

Concepts, methodologies and tools for monitoring project implementation, from the perspective of the tri- ple constraint (scope, time, cost) and complementary processes.

Analysis and evaluation of the project portfolio within the organisation: strategic, operational and financial perspectives.

Analysis of the specific characteristics of engineering projects in the field of telecommunications; R&D projects, implementation and deployment, data-intensive projects, and others.

Project/case study
